

MOBILE VOLUMETRIC HOT ASPHALT PRODUCTION, FOR THE ROAD REPAIR CONTRACTOR.

Hotmix Trucks are the key to increasing revenue by maximising efficiency and increasing the number of completed jobs per day.

The Hotmix truck produces Hot Mix Asphalt (HMA) at a variable rate of upto 10 tonnes per hour, accommodating a single operator or larger crews, from raw materials carried in three separate aggregate bins that enable you to deliver binder or surface mixes on demand.

Materials are volumetrically mixed, heated, and combined with asphalt cement to produce easily workable HMA mixes at the perfect temperature for installation and compaction in the precise quantity required.

SERVICE & BACKUP

As part of our dedication to aftersales care, we offer a unique range of service and backup options here at Hotmix.

We provide a 24/7 nationwide service and repair package, giving you complete peace of mind that your trucks will stay on the road all year round. We also stock a wide range of spares for Hotmix Trucks as well as other brands of volumetric mixers.

All of our staff are fully trained and can give expert advice on all your maintenance needs, ensuring that whatever the problem may be, we are capable of providing a swift and effective solution.

PURCHASE OPTIONS

We have a number of purchase options available for our Hotmix Trucks, tailored to meet a wide range of budgets and usages.

If outright purchase is not a feasible option, we also offer competitive short-term leasing rates to enable you to take advantage of the benefits of a Hotmix truck during your project.

We are also happy to take your old machine in part exchange for a new Hotmix truck.
